The great advantage of early rising is the good start it gives us to our day's work. The early riser has done a large amount of hard work before other men have got out of bed. In the early morning the mind is fresh, and there are few sounds or other distractions, so the work done at that, fresh is generally well done. In many cases the early riser also finds time to take some exercise in the fresh morning air, and this exercise supplies him with a fund of energy that will last until the evening.

By beginning so early, he knows that he has plenty of time to do thoroughly all the work he can be expected to do, and is not tempted to hurry over any part of it. All his work being finished in good time, he has a long interval of rest in the evening before the timely hour when he goes to bed. A sound night's rest rises early next morning in good health is most refreshing, and

after he gets to sleep several hours before midnight, at the time when sleep and spirits for the labors of a new day.

Questions

1. What is the great advantage of early rising?
2. How is early morning different from other hours of the day?
3. Why is the early riser not tempted to hurry over his day's work?
4. What enables the early riser to go to bed at the proper time?
5. What are the advantages of going to sleep well before midnight?

Passage 1

A volcano is a burning mountain with a great hole running deep into the earth. Out of it come smoke, gases and stones. The mouth of the opening is called the crater of the volcano.

Volcanoes are not always burning. Sometimes a volcano will remain quiet for centuries. And then it will suddenly become active. This is called volcanic eruption.

When the eruption takes place, great clouds of ashes, dust, gas and steam rise from the crater. Loud noises come from the crater. After sometime, white hot molten rock, called lava begins to flow down the mountain sides. This may go on for days or weeks. Then the volcano will 'go to sleep' again for many years. Most volcanoes are found near the seas.

Passage 2

There was a lion who was the king of the forest. He was big, fierce and strong. All the other animals brought him gifts from every corner of the forest. They were really afraid of him.

‘King must have ministers to help him’, the lion thought one day. And he sent for the fox.

‘You are known to be very wise and clever. I want you to be my Home Minister.’ ‘Many many thanks for this honour, your majesty’, said the fox, bowing low.

Then he called a panther and said, ‘You are known to be very alert and swift-footed. You will be my Defence Minister.’

‘Thank you, Sir,’ said the panther.

The next to be summoned was a crow.

‘You can fly high and can see distant objects. So you’ll be my Foreign Minister.’

‘I am grateful to you, my master,’ said the crow. The three ministers swore to remain loyal to the king. The lion, in return promised to feed and protect them.

The system of education in our country is defective. It is not keeping pace with the passage of time. It follows the pattern which was valid five decades ago.

The aim of education is to prepare students for the tough battle of life. The basic needs of life are a sound mind in a sound body, and skill to make a living. It widens the sphere of knowledge and builds our character. In short, education should turn out a strong team of responsible citizens.

Education has to be related to life and also the needs of the nation. Not gold but only men of character make a nation great and strong.

It is unfortunate that our policy-makers give little importance to moral education and noble values. They set up schools and colleges only to turn out an army of graduates, good for nothing. We need men with brain, we need good scientists and technicians, we need tough soldiers for the army.

Education for all sounds sweet. But mere slogans and schemes on paper won't take us far. Our leaders don't have the will to serve the nation. Also schemes fail at the ground level.

. On the basis of the reading of the above passage, complete the following sentences:

(a) Our education system is wrong because _____

(b) The aim of education is to _____

(c) Our nation needs _____

(d) Men of strong character alone make _____

(e) All our experiments fail to improve the quality of education because _____

HISTORY

1 Read the passage carefully to understand and answer

In the 6th century BC, ancient India had a number of kingdoms which emerged during the Vedic Age. This period saw socio-economic development along with religious and political developments across the Indo-Gangetic plain. These permanent settlements led to the evolution from janapadas to mahajanapadas. By sixth century BC, the centre of major political activity shifted from western part of Gangetic plain to the eastern part, comprising the present day Bihar and eastern UP. Major reason for this shift was, the fertile lands of this area with better rainfall and rivers, their closeness to iron production centers also played a key role. In fact, it was the increased use of iron tools and weapons that enabled small states to become kingdoms, known as Mahajanapadas.

1. What is Mahajanapadas?
2. Name the 16 Mahajanapadas?
3. What does the term janapada mean?
4. How are Republics different from monarchies

2. The Rig Veda is hard to translate accurately, because it is the oldest Indo-Aryan text, composed in the archaic Vedic Sanskrit. There are no closely contemporary extant texts, which makes it difficult to interpret. The Rig Veda is a collection of Vedic Sanskrit hymns counted among the four Hindu religious texts known as the Vedas. The Rig Veda was likely composed between roughly 1700–1100 BCE, making it one of the oldest texts of any Indo-Iranian language, one of the world's oldest religious texts.

 14. A rectangular park is 45 m long and 30 m wide. A path 2.5 m wide is constructed outside the park. Find the area of the path.
 15. A path 5 m wide runs along inside a square park of side 100 m. Find the area of the path. Also find the cost of cementing it at the rate of Rs 250 per 10 m².
 16. Two cross roads, each of width 5 m, run at right angles through the centre of a rectangular park of length 70 m and breadth 45 m and parallel to its sides. Find the area of the roads. Also find the cost of constructing the roads at the rate of Rs 105 per m².
 17. What are the coefficients of x in the expression $8 - x + y$?
 (a) 1 (b) -1 (c) 8 (d) none of these
 18. What are the coefficients of y in the expression $4x - 3y$?
 (a) 4 (b) -3 (c) 3 (d) none of these
 19. Write an expression : Raju's father's age is 5 years more than 3 times Raju's age . If Raju's age is x years , then father's age is
 (a) $3x+5$ (b) $5-3x$ (c) $3x-5$ (d) $15x$
 20. The number of terms in $4p^2q - 3pq^2 + 5$ is
 (a) 7 (b) 3 (c) 1 (d) 4

A.Solve the given assignment in your science H.W. notebook.(Subject Enrichment Activity based on CCTS).

ASSIGNMENT

1. A goat eats away all the leaves of a small plant (balsam). However, in a few days, new leaves could be seen sprouting in the plant again. How did the plant survive without leaves?
2. . Unscramble the following to form terms related to modes of nutrition. (i) RASPAEIT (ii) ROPEHYTSAP (iii) TOROPHAUT (iv) SIBIOMSYS
3. Nitrogen is an essential nutrient for plant growth. But farmers who cultivate pulse crops like green gram, bengal gram, black gram, etc. do not apply nitrogenous fertilizers during cultivation. Why?
4. Wheat dough if left in the open, after a few days, starts to emit a foul smell and becomes unfit for use. Give reason.
5. Sunlight, chlorophyll, carbon dioxide, water and minerals are raw materials essential for photosynthesis. Do you know where they are available? Fill in the blanks with the appropriate raw materials. (a) Available in the plant : _____ (b) Available in the soil : _____, _____ (c) Available in the air : _____ (d) Available during day : _____
6. Name the parts of the alimentary canal where (i) water gets absorbed from undigested food. (ii) digested food gets absorbed. (iii) the taste of the food is perceived. (iv) bile juice is produced
7. Choose the odd one out from each group and give reasons. (i) liver, salivary gland, starch, gallbladder (ii) stomach, liver, pancreas, salivary gland (iii) tongue, absorption, taste, swallow (iv) esophagus, small intestine, large intestine, rectum
8. Fill in the blanks with suitable words: (a) The alimentary canal stretches from to(b)Digestion of food starts in and gets completed in (c) the largest gland in the human body is.....
9. Ruminants such as cows and buffaloes swallow their food hurriedly and then sit restfully and chew their food. Can you reason why?
- 10.The teacher told her students the story of two friends. She told them that, in the story, the friendship, between a visually challenged boy and a lame boy, helps them both to face, and overcome, the very many challenges

of their day-to-day life. She went on to compare their friendship with the 'symbiotic relationship' between two organisms.

- Suggest any two 'values' that, according to you, must have been there in the two friends.
- In what way is the friendship, between the two boys, similar to the 'symbiotic relationship' between two organisms?
- Give one example of a 'symbiotic relationship' between two organisms. **B. Make a newsletter having 20 science related news.**

C. Prepare a chart and presentation on any one topic of your choice from your syllabus.

D. Finish the given Art Integrated Activities in your Activity Notebook. 1. Complete the web chart

2. Draw the diagram of a Plant showing the process of photosynthesis.

3. Explain the two modes of nutrition in plants with the help of Flow Chart. **E. Read and write the given Experiment in your Activity Notebook and grow your own bread mould, take pictures and paste in same Notebook (Record Video of full process of growing bread mould)**

AIM:

To grow your own bread mould.

THINGS NEEDED:

Three slices of bread, water, marker, three reusable bags

THEORY:

These organisms are called fungi. They have a different mode of nutrition. They secrete digestive juices on the dead and decaying matter and convert it into a solution. Then they absorb the nutrients from it. This mode of nutrition in which organisms take in nutrients in solution form from dead and decaying matter is called saprotrophic nutrition. Plants which use saprotrophic mode of nutrition are called saprotrophs. Fungi also grow on pickles, leather, clothes and other articles that are left in hot and humid weather for long time. PROCEDURE:

- Place a slice of bread in each bag and seal it properly
- Number each bag with the marker
- Add some water to first bag and put it in dark place
- Put the second bag in bright sunny place
- Put the third bag in the refrigerator
- Check each bag after a week and record the observation

OBSERVATION:

- You may have also seen fluffy umbrella-like patches growing on rotting bread.
- At the end of the week

each bag will have a different kind of mould growth

CONCLUSION:

Bread is a good food source for some kinds of fungus. The air around us is full of microscopic mould spores that require the right condition to settle on an organic substance and digest it. PRECAUTION:

Mould spores just need the right environment to grow and flourish.

Think about a project / model and work on it to participate in National Children Science Congress (NCSC 2022).

Holiday Home Work (Autumn Break)

Class. VII. Subject. English

Q.1 Read the passage given below and answer the questions that follow:

. Without oil the modern world could not exist. Oil is needed for travel, because it powers our motor cars, buses, trains, aeroplanes and ships. Oil helps machines of all kinds, to run easily. Oil also gives us other substances, such as artificial rubber, artificial materials for clothing, and new materials for making things. Yet till a hundred years ago no one used oil for any of these purposes. In fact, no one knew that much oil existed.

2. Men do not make oil; they find it. They look for oil in many ways. They begin by making a map of the land where they are searching. Then they use the map to help them in choosing a site to explore with more care. They start their work by examining the rock from under the surface and come to know whether oil is likely to be underneath the rock.

3. To find out how deeply the oil is buried they need to know how far under the surface the rock is. If everything seems hopeful the men decide to drill down through the rock. In this way they find out whether oil really does lie underneath it. Often this test – well, as it is called, is far away from any town and there is much work to do before any drilling starts. Houses and roads must be built for the people coming to drill the test – well. Then the big derrick that carries the drill must be put up. This derrick is a strong framework of steel about 45 meters high. The drill is raised and lowered from inside the derrick.

4. Drilling for oil often means making a well that goes very deep into the earth. Such deep wells have never been made until modern times. The rate of drilling depends upon the kind of rock being drilled: it can be as fast as 60 meters an hour. Drilling is usually done on dry land, but we can also drill the rock under lakes or seas by putting the derrick on a special platform above the water

Read the above passage carefully and answer the questions that follow.

1. How is oil useful to machines?
2. How do men go about looking for oil?
3. Drilling for oil often means _____
4. The rate of drilling depends upon _____
5. Drilling is usually done on _____
6. To find out how deeply the oil is buried we need to _____
7. Find the words from the passage which mean:
 - a. make a hole (para 3)
 - b. a kind of crane with a movable pivoted arm. (para 3)

Q.2 Read the following comprehension for class 8 exam carefully and answer the given questions: (5 Marks)

About the year 1900, a small, dark-haired boy named Charles Chaplin was often seen waiting outside the back entrances of London theatres. He looked thin and hungry but his blue eyes were determined. He was hoping to get work in show business. He could sing and dance. His parents were music-hall performers and he had been born into the life of the theatre. And, although his own boyhood was painfully hard, he knew how to make people laugh.

His own father had died from drinking too much. And his mother was not really able to look after Charles and his older half-brother, Sid. She was often sick in mind and had to be sent into hospital.

2.1 Choose the right option.

Q 1) The boy Charles Chaplin was _____.

- a) brown-haired
- b) dark-haired
- c) red-haired
- d) light-haired

Q 2) Chaplin thought to get a job in _____.

- a) soap business

b) hotel business

c) show business

d) hospital business

Q 3) His parents were _____.

a) music-hall performers

b) actors

c) singers

d) directors

Q 4) His father had died due to _____.

a) an illness

b) accident

c) drinking

d) suicide

Q 5) The meaning of 'determined' is _____.

a) mind made up

b) mind turn up

c) mind fade up

You are Suresh of 25, Nehru Nagar, Hyderabad. Write a letter to your friend Vinaya describing your birthday party.

CLASS: 8 SUBJECT: ENGLISH

INSTRUCTION: Do in A4 sheet/ruled sheet

1. Suppose you are one of the volunteers who went to the Andaman and Nicobar Islands for relief work after the tsunami. You work in the relief camps, distributing food, water and medicine among the victims. You listen to the various stories of bravery of ordinary people. You admire their grit and determination. Write a diary entry.

HINT: You may start in this way.

31December, 2004

The killer tsunami struck these islands five days ago. But the victims are being brought in even now. Each one has a story to tell...

2. Write a letter to your friend describing a visit to any place which you found beautiful and inspiring.

3. If you were given a chance to be the principal of a school. What kind of school you would make? Write in about 100 words.

Hints: Type of teaching and learning, type of teachers, kind of curriculum etc.

4. Write a story in about 150 words by continuing the following :
"I jumped out of the bed at midnight..."

5. Write a letter to the Editor of a newspaper, complaining about the bad condition of water supply in your locality. You are Prabhu Dayal living at H-19 Dayal Bagh Colony, New Delhi.

6. Write one page cursive handwriting daily. (text can be taken from your text book.)

7. Write atleast five news which you found inspiring and encouraging in HW notebook.

8. Read the passage given below and answer the questions that follow.

An elderly carpenter was ready to retire. He told his employer of his plans to leave the house building business and live a more leisurely life with his family. He would miss the pay cheque, but he needed to retire. The employer was sorry to see his good worker go and asked if he could build just one more house as a personal favour. The carpenter said 'yes', but in time it was easy to see that his heart was not in his work. He resorted to shoddy workmanship and used inferior material. It was an unfortunate way to end his career

When the carpenter finished his work, his employer handed over the key of the house to the carpenter- "This is your house, my gift to you."

What a shock! What a shame ! If he had only known he was building his own house, he would have done it all so differently! Now he had to live in a poorly built house. So it is with us. We build our lives, a day

at a time, often putting less than our best into the building. Then, with a shock, we realize we have to live in the house we have built. If we could do it over, we would do it much differently. But, you cannot go back. You are the carpenter, and every day you hammer a nail, place a board, or erect a wall. Someone once said, your attitude, and the choices you make today, help build the "house" you will live in tomorrow. Therefore, build wisely!

Questions:

1. What did the carpenter tell his employer?
2. What favour did his employer ask from the carpenter ?
3. What surprise did the employer have for the carpenter ?
4. Why was the surprise a 'shame' for the carpenter?
5. Which word in the first paragraph means the same as 'art of skill of a workman' ?

3. Learn the Cubes of the numbers from 1-25 .
4. Learn and practice all the divisibility rules.
5. Write and learn following identities:

$$(a + b)^2 = a^2 + 2ab + b^2$$

$$(a - b)^2 = a^2 - 2ab + b^2$$

$$(a + b) (a - b) = a^2 - b^2$$

$$(x + a) (x + b) = x^2 + (a + b) x + ab$$

6. write and learn the formula for the area of rectangle,square,triangle,parallelogram,circle and trapezium .Draw these figures also.

ACTIVITIES

- write various nutrients found in your 5 favourite food items.

PRESENT THE COLLECTED DATA IN A TABULAR FORM

- Collect data of amount of various nutrients required by an adult daily.
- Draw a pie chart on requirement of nutrients by an adult.
 1. Find ratio of protein required by a person to its body weight.
 - Write a sports activity of your choice played in field.
 - Draw the shape of ground required for that sports event.

Question 1.

The pressure which is exerted by air around us is known as

- (a) force
- (b) atmospheric pressure

- (c) muscular force
- (d) friction

Question 2.

Force acting on per unit area is called

- (a) non-contact forces
- (b) contact forces
- (c) force
- (d) pressure

Question 3.

A _____ exerted by an object on another is a force.

- (a) Push or pull
- (b) Contact or non-contact force
- (c) Pressure
- (d) Magnitude

Question 4.

The force exerted by the earth to pull the object towards itself is called

- (a) electrostatic force
- (b) gravitational force
- (c) muscular force
- (d) contact force

Question 5.

Muscular force is also called _____ force.

- (a) non-contact
- (b) contact
- (c) gravitational
- (d) magnetic

Question 6.

The force exerted by a charged body on another char

- (a) gravitational force
- (b) electrostatic force
- (c) non-contact force
- (d) contact force

Question 7.

Force changes the

- (a) motion of body
- (b) speed of body
- (c) shape of body
- (d) all of these

Question 8.

The force exerted by our muscle is called

- (a) electrostatic force
- (b) muscular force
- (c) gravitational force
- (d) non-contact force

Question 9.

1 kilogram weight is equal to

- (a) 98 N
- (b) 9.8 N

(c) 0.98 N (d)

0.098 N

Question 10.

A spring balance is used for measuring

- (a) mass
- (b) weight
- (c) pressure
- (d) speed

Question 11.

Two boys A and B are applying force on a block. If the block moves towards the boy A, which one of the following statements is correct?

- (a) Magnitude of force applied by A is greater than that of B.
- (b) Magnitude of force applied by A is smaller than that of B.
- (c) Net force on the block is towards B.
- (d) Magnitude of force applied by A is equal to that of B.

Question 12.

When two forces act in opposite directions, then net force acting is the

- (a) sum of two forces
- (b) difference between two forces
- (c) both of these
- (d) none of these

Question 13.

The strength of force is expressed by its

- (a) weight
- (b) mass
- (c) magnitude
- (d) longitudinal force

Question 14.

Leaves fall down on the ground due to

- (a) electrostatic force
- (b) magnetic force
- (c) gravitational force
- (d) muscular force

Question 15.

State of motion is described by

- (a) Position of rest
- (b) Position of motion
- (c) Both by the state of rest or motion
- (d) None of these

Question 16.

When the hammer strikes the gong of an electric bell, which of the following force is responsible for the movement of hammer?

- (a) Gravitational force alone
- (b) Magnetic force alone
- (c) Electrostatic force alone
- (d) Frictional force alone

Question 17.

During dry weather, while combing hair, sometimes we experience hair flying apart. The force responsible for this is

- (a) force of gravity
- (b) force of friction
- (c) electrostatic force
- (d) magnetic force

Question 18.

A container is filled with water as shown in the given figure. Which of the following statements is

correct about pressure of water?

- (a) Pressure at A > Pressure at B > Pressure at C
- (b) Pressure at A = Pressure at B = Pressure at C
- (c) Pressure at A < Pressure at B > Pressure at C
- (d) Pressure at A < Pressure at B < Pressure at C

Question 19.

Two objects repel each other. This repulsion could be due to

- (a) frictional force only
- (b) electrostatic force only
- (c) magnetic force only
- (d) either a magnetic or an electrostatic force

Question 20.

Which one of the following forces is a contact force?

- (a) Force of gravity
- (b) Magnetic force
- (c) Force of friction
- (d) Electrostatic force

Question 21.

A brick is kept in three different ways on a table as shown in given figure. The pressure exerted by the brick on the table will be

- (a) maximum in position A
- (b) maximum in position C
- (c) maximum in position B
- (d) equal in all cases

Question 22.

A push or pull on an object is called

- (a) Pressure
- (b) Push-pull
- (c) Force
- (d) All of the above

Question 23.

If two forces act in the opposite directions on an object, the net force acting on it is the

- (a) Sum of the two forces
- (b) difference between the two forces
- (c) Multiplication of the two forces
- (d) Division of the two forces

Question 24.

Which of the following is proper example(s) to explain that force on an object may change its shape

- (a) A ball of dough rolled into chapati
- (b) Pressing a rubber ball kept on table

- (c) Making model using clay
- (d) All of the above

Question 25.

A ball rolling on the ground slows down and finally stops. This is because of

- (a) Force
- (b) Less force applied
- (c) Friction
- (d) None of the above

Question 26.

Force of friction always acts on moving objects and its direction shall be _____

- (a) On any direction
- (b) Along the direction of motion
- (c) Perpendicular to the direction of motion
- (d) Opposite to the direction of motion

Question 27.

If In a tug-o-war, when two teams are pulling a rope, and the rope does not move towards anyteam, it implies that

- (a) Equal force is being applied in the same direction
- (b) Equal Force is being applied in opposite direction
- (c) No force is applied in any direction
- (d) Cannot be explained

Question 28.

An example of a non- contact force is

- (a) Force exerted by us to lift a bucket
- (b) Push a stationary car
- (c) Force exerted by magnet
- (d) Hit a cricket ball for a 6 run

Question 29.

Pressure =

- (a) Area / force on which it acts
- (b) force / area on which it acts
- (c) Volume / force on which it acts
- (d) Force / volume on which it acts

Question 30.

Gravity is

- (a) Repulsive
- (b) Attraction + Repulsive force
- (c) Attractive force
- (d) Not a force

Question 31.

A batsman hits the ball for a boundary past the bowler i.e. four runs. The batsman thus

- (a) Changes the direction & speed of the ball
- (b) Does not change the direction but speed only
- (c) Does not change the speed but direction only
- (d) Does not change either direction or speed

22. Read the given source and answer the following questions:

As far back as in 1928, Motilal Nehru and eight other Congress leaders drafted a Constitution for India. In 1931, the resolution at the Karachi session of the Indian National Congress dwelt on how independent India's constitution should look like. Both these documents were committed to the inclusion of universal adult franchise, right to freedom and equality and to protecting the rights of minorities in the constitution of independent India. Thus, some basic values were accepted by all leaders much before the Constituent Assembly met to deliberate on the constitution. The familiarity with political institutions of colonial rule also helped develop an agreement over the institutional design. The British rule had given voting rights only to a few. On that basis the British had introduced very weak legislatures. Elections were held in 1937 to Provincial Legislatures and Ministries all over British India. These were not fully democratic governments. But the experience gained by Indians in the working of the legislative institutions proved to be very useful for the country in setting up its own institutions and working in them. That is why the Indian

45. Q.1 Read the passage given below and answer the questions that follow:

46. 1 The Amazon is the world's largest tropical rainforest. It covers an area of nearly 2.8 million square miles, which is nearly the size of the continent of Australia. The Amazon rainforest gets its life from the majestic Amazon river, the world's second largest river, which runs directly through the heart of the region. The rainforest itself is simply the drainage basin for the river and its many tributaries. The vast forest itself consists of four layers, each featuring its own ecosystems and specially adapted plants and animals.
47. 2 The forest floor is the lowest region. Since only two per cent of the sunlight filters through the top layers to the understory, very few plants grown here. The forest floor, however, is rich with rotting vegetation and the bodies of organisms, which are quickly broken down into nutrients and decomposers such as millipedes and earth worms use nutrients for food.

KENDRIYA VIDYALAYA NO.1 ROORKEE
AUTUMN BREAK HOLIDAY HOMEWORK (2022-23)

48. 3 The understory is the layer above the forest floor. Much like the forest floor, only about 2-5 per cent of the sunlight reaches this shadowy realm. Many of the plants in the understory have large, broad leaves to collect as much sunlight as possible. The understory is so thick that there is very little air movement. As a result, plants rely on insects and animals to pollinate their flowers.
49. 4. The layer above the understory is the canopy. This is where much of the action in the rainforest occurs. Many canopy leaves have specially adapted leaves which form “drip tips”. Drip trips allow water to flow off the leaves which prevents mosses, fungi, and lichens from occupying the leaves. Leaves in the canopy are very dense and filter about 80 per cent of the sunlight. The canopy is where the wealth of the rainforest’s fruits and flowers grow. Bromeliads, cut-like plants, provide drinking pools for animals and breeding locations for tree frogs.
50. (a) The Amazon rainforest gets its life from the majestic river, the world’s second largest river.
(b) The vast rainforest consists of layers, each featuring its own ecosystem
51. (c) Bromeliads are cut-like plants that provide drinking for animals.
(d) The Amazon is the world’s largest tropical rainforest. (True/False)
(e) Plants never rely on insects and animals to pollinate their flowers. (True/False)
52. (f) The forest floor is rich with rotting vegetation and the bodies of dead organism.

- (ii) Positively charged ion

6. The atomic number of three elements A, B and C are 9, 10 and 13 respectively. Which of them will form a cation?

Ch 4. STRUCTURE OF ATOM

1. Which subatomic particle is absent in an ordinary hydrogen atom?
2. J. Chadwick discovered a subatomic particle which has no charge and has mass nearly equal to that of a proton. Name the particle and give its location in the atom.
3. Is it possible for the atom of an element to have one electron, one proton and no neutron? If so, name the element.
4. Electron attributes negative charge, protons attribute positive charge. An atom has both but why there is no charge?
5. One electron is present in the outermost shell of the atom of an element X. What would be the nature and value of charge on the ion formed if this electron is removed from the outermost shell?
6. In the atom of an element X, 6 electrons are present in the outermost shell. If it acquires noble gas configuration by accepting requisite number of electrons, then what would be the charge on the ion so formed ?

Ans.	An ANN is a computational network based on biological neural networks that construct the structure of human brain.
Q.2-	Define (i) Deep Learning (ii) Machine Learning.
Ans.	(i) In Deep learning the machine is trained with huge amount of data which helps it to train itself around the data. (ii) Machine learning enables machines to improve at tasks with experience
Q.3-	What is the key advantage of neural network?
Ans.	Neural Network- able to extract data features automatically without needing the input of the programmer.
Q.4-	A neural network is a machine learning algorithm based on the model of a human neuron. (i) True (ii) False
Ans.	(i) True
Q.5-	Define any Two (i) Input Layer (ii) Hidden Layer (iii) Output Layer
Ans.	Role of Input Layer- acquire data and feed it to neural network Role of Hidden Layers- Whole processing occurs in hidden layers Role of Output Layer – Accepts final processed data from hidden layer.
Q.6-	Which approach is commonly used when we have a known dataset or labeled dataset? a) Supervised b) unsupervised c) Rule based d) Learning based

Q.11-	Write the full form of the following organizations. i. ANN ii. BNN
Ans.	Ans : 1. ANN Artificial Neural Network 2. BNN Biological Neural Network
Q.12-	Define the following terms i. Deep Learning ii. Neural Network
Ans.	i) Deep Learning : It is an Artificial Intelligence function that imitates the workings of the human brain in processing data and creating patterns for use in decision making. It is a subset of machine learning which helps the machine to take decisions and learn from large datasets ii) Neural Network : A neural network is defined as a combination of algorithms to understand the relationship between various sets of data to process and then takes out some meaningful information from it.
Q.13-	What is the need of neural networks in Artificial Intelligence?
Ans.	They are used to solve real-life complex problems. These networks can learn and create the relationships between all the inputs and gives the result. They can handle non linear and complex problems very effectively. The main advantage of neural networks is that they are able to extract data features automatically without needing any input from the programmer.

Ans.	Multi-Layer Perceptrons (MLP) Convolutional Neural Networks (CNN) Recurrent Neural Networks (RNN)
Q.16-	What is Artificial Neural Network?
Ans.	The term "Artificial Neural Network" is derived from Biological neural networks that develop the structure of a human brain. Similar to the human brain that has neurons interconnected to one another, artificial neural networks also have neurons that are interconnected to one another in various layers of the networks.
Q.17-	ANNs are made up ofnodes which imitate biological neurons of the human brain.
Ans.	Input Nodes.
Q.18-	In general, a neural network consists of an input and output layer with one or multiple _____ layers within..
Ans.	Hidden Layer.
Q.19-	Write any two similarities between Biological Neural Networks and Artificial Neural Networks.
Ans.	1. The presence of neurons as the most basic unit of the nervous system. 2. The input is directly passed to a neuron and output is also directly taken from the neuron,
Q.20-	Write any two advantages of Artificial Neural Network?
Ans.	1. A neural network can implement tasks that a linear program cannot. 2. A neural network determines and does not require to be reprogrammed.
Q.21-	Write any 3 Attributes of Artificial Neural Networks.
Ans.	1. Faster in processing information. Response time is in nanoseconds. 2. Serial processing. 3. Less size & complexity. It does not perform complex pattern recognition tasks.

Ans.	True
Q.24-	Explain the difference between Neural networks and Conventional computing.
Ans.	Neural Network -More Probabilistic, No Central Processor, Respond in parallel Conventional Computing - works on serial processing logic, Computational steps are deterministic, sequential and logical, Uses Central Processor. Or Conventional computers have to learn by rules, while artificial neural networks learn by example, by doing something and then learning from it.

76. Read the given source and answer the following questions:

As far back as in 1928, Motilal Nehru and eight other Congress leaders drafted a Constitution for India. In 1931, the resolution at the Karachi session of the Indian National Congress dwelt on how independent India's constitution should look like. Both these documents were committed to the inclusion of universal adult Franchise, right to freedom and equality and to protecting the rights of Minorities in the constitution of independent India. Thus, some basic values were accepted by all leaders much before the Constituent Assembly met to deliberate on the Constitution. The familiarity with political institutions of colonial rule also helped develop an agreement over the institutional design. The British rule had given voting rights only to a few. On that basis the British had introduced very weak legislatures. Elections were held in 1937 to Provincial Legislatures and Ministries all over British India. These were not fully democratic governments. But the experience gained by Indians in the working of the legislative institutions proved to be very useful for the country in setting up its own institutions and working in them. That is why the Indian constitution adopted many institutional details and procedures from colonial laws like the Government of India Act, 1935.

38 Case Study – 3

Lakshman Jhula is located 5 kilometers north-east of the city of Rishikesh in the Indian state of Uttarakhand. The bridge connects the villages of Tapovan to Jonk. Tapovan is in Tehri Garhwal district, on the west bank of the river, while Jonk is in Pauri Garhwal district, on the east bank. Lakshman Jhula is a pedestrian bridge also used by motorbikes. It is a landmark of Rishikesh.

A group of Class X students visited Rishikesh in Uttarakhand on a trip. They observed from a point (P) on a river bridge that the angles of depression of opposite banks of the river are 60° and 30° respectively. The height of the bridge is about 18 meters from the river.

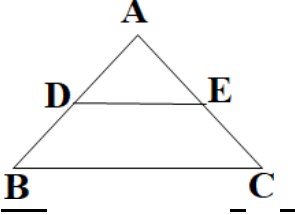

Based on the above information answer the following questions.

I.	Find the distance PA.	1
II.	Find the distance PB	1
III.	Find the width AB of the river. [OR] Find the height BQ if the angle of the elevation from P to Q be 30° .	2

36	<p>A tiling or tessellation of a flat surface is the covering of a plane using one or more geometric shapes, called tiles, with no overlaps and no gaps. Historically, tessellations were used in ancient Rome and in Islamic art. You may find tessellation patterns on floors, walls, paintings etc. Shown below is a tiled floor in the archaeological Museum of Seville, made using squares, triangles and hexagons.</p>

We all have seen the airplanes flying in the sky but might have not thought of how they actually reach the correct destination. Air Traffic Control (ATC) is a service provided by ground-based air traffic controllers who direct aircraft on the ground and through a given section of controlled airspace, and can provide advisory services to aircraft in non-controlled airspace. Actually, all this air traffic is managed and regulated by using various concepts based on coordinate geometry and trigonometry.

<p>At a given instance, ATC finds that the angle of elevation of an airplane from a point on the ground is 60°. After a flight of 30 seconds, it is observed that the angle of elevation changes to 30°. The height of the plane remains constantly as $3000\sqrt{3}$ m. Use the above information to answer the questions that follow-</p> <p>(i) Draw a neat labelled figure to show the above situation diagrammatically.</p> <p>(ii) What is the distance travelled by the plane in 30 seconds?</p> <p style="text-align: center;">OR</p> <p>Keeping the height constant, during the above flight, it was observed that after $15(\sqrt{3}-1)$ seconds, the angle of elevation changed to 45°. The diagram above is a schematic diagram of a household circuit. The house shown in the above diagram has 5 usable spaces where electrical connections are made. For this house, the mains have a voltage of 220 V and the net current coming from the mains is 22 A.

- What is the mode of connection to all the spaces in the house from the mains?
- The spaces 5 and 4 have the same resistance and spaces 3 and 2 have respective resistances of 20Ω and 30Ω . Space 1 has a resistance double that of space 5. What is the net resistance for space 5?
- What is the current in space 3?
- What should be placed between the main connection and the rest of the house's electrical appliances to save them from accidental high electric current?

SECTION-E

Q.no. 37 to 39 are case - based/data -based questions with 2 to 3 short sub - parts. Internal choice is provided in one of these sub-parts.

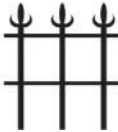

37

Two students decided to investigate the effect of water and air on iron object under identical experimental conditions. They measured the mass of each object before replacing it partially immersed in 10 ml of water. After a few days, the object were removed, dried and their masses were measured. The table shows their results.

4

Student	Object	Mass of Object before Rusting in g	Mass of the coated object in g
A	Nail	3.0	3.15
B	Thin plate	6.0	6.33

- What might be the reason for the varied observations of the two students?
- In another set up the students coated iron nails with zinc metal and noted that, iron nails coated with zinc prevents rusting. They also observed that zinc initially acts as a physical barrier, but an extra advantage of using zinc is that it continues to prevent rusting even if the layer of zinc is damaged. Name this process of rust prevention and give any two other methods to prevent rusting.

Analytical Paragraph – 2

The given double bar graph shows the preferences of children in a school in playing different games over the span of six years. Write an analytical paragraph about the given information.

Q.6 Read the following passage and answer the questions that follow.

Passage 1:

KENDRIYA VIDYALAYA NO.1 ROORKEE
AUTUMN BREAK HOLIDAY HOMEWORK (2022-23)

We must do all we can to stop conflicts and civil war. Most conflicts happen in poor countries, especially which are badly governed or where power and wealth are not distributed fairly between different tribal or religious groups. So the best way to check fighting is to make a political arrangement in which all groups have their representatives. The need is to ensure human rights and economic development of all. The next fundamental freedom is one that is not mentioned in the UN charter. In 1945, the leaders could not imagine that such a situation would arise. That is the freedom of future generations to live on this planet.

Even now many of us have not understood its importance. We are using up the limited resources for our present use. We are over using and even wasting them. We are, in fact, robbing our children of their right to live.

We must preserve our forests, fisheries and wildlife. All of these are collapsing because of our own habit of consuming or destroying them.

Questions:

1. Answer the following questions briefly:

- (a) Why do most conflicts happen in poor countries?
- (b) What is the best way to check conflicts?
- (c) What is meant by 'the freedom of future generations to live'?
- (d) How are we robbing our children of their basic right?
- (e) What must we preserve for our children?

2. Find words from the passage that mean the same as

- (a) fighting
- (b) keep safely
- (c) coming to end

Passage 2:

Food can maintain and save life. It can destroy life as well. Proper food serves as

KENDRIYA VIDYALAYA NO.1 ROORKEE
AUTUMN BREAK HOLIDAY HOMEWORK (2022-23)

medicine, improper food works as poison. A little care about the quality and quantity of food will keep us healthy and happy. If we go about eating all sorts of things, we shall become sick.

We take pride in calling ourselves civilized. Being sensible means to know the difference between good and bad, right and wrong. It will not do to become slaves to our tongue or taste. Even cattle, birds and beasts eat only what is best for their body. We mostly eat processed food and refined sugar. We pay heavily for junk food, for Chinese dishes or deep fried snacks. As a result we catch diseases. We have drifted away from mother nature. We laugh at the rules of hygiene, healthy diet and the advice of our elders. This has given rise to diabetes.

We offer chocolates, cakes and ice creams too often to our children. We also attend parties or dine out every day. This way we invite obesity and diabetes.

Questions:

1. Answer the following questions briefly:

- (a) What are the functions of food?
- (b) What is meant by 'improper food'?
- (c) What does 'civilised life' imply?
- (d) Explain: We have drifted away from nature.
- (e) How does modern life style and food habits affect us?

2. Find words from the passage that mean the same as:

- (a) being fat
- (b) cleanliness

Passage 3:

The cinema is the cheapest source of entertainment today. Millions of people see movies and enjoy them. It is a good pastime in all the places – big or small.

The cinema industry has made rapid progress after independence. In the beginning

KENDRIYA VIDYALAYA NO.1 ROORKEE
AUTUMN BREAK HOLIDAY HOMEWORK (2022-23)

there were silent, and black and white movies. Now we are dazzled by the colours in every movie.

Big posters are seen on the walls of cities and towns for advertisements. They also announce the coming movies in the city. There is always a rush before the booking windows. So the tickets are often sold in the black market or at a premium.

On the one hand the cinema is a source of entertainment. On the other it is also a source of knowledge and information. Films satisfy all the sections of people and their different tastes.

There are religious movies and historical movies. They recreate the past, the old culture and lifestyle. Social films spread awareness about social evils of dowry, casteism and communal feelings. Some films expose the corruption in high places among the policemen and the citizens.

Questions:

1. Answer the following questions briefly:

- (a) Why is cinema so much popular?
- (b) How can you say that the cinema industry has made rapid progress after independence?
- (c) Why are tickets often sold in the black market?
- (d) Mention two advantages of cinema.
- (e) What is the main purpose of making social films?

. Find words from the above passage which mean the opposite to:

- (a) costliest
- (b) slow
- (c) present
- (d) hide.

Passage 4:

KENDRIYA VIDYALAYA NO.1 ROORKEE
AUTUMN BREAK HOLIDAY HOMEWORK (2022-23)

Do you know that around 270 eucalyptus trees or 460 bamboo plants are saved when we produce one tonne of hand-made paper? It is ecofriendly hand-made paper that also checks pollution of water, land and air. Large quantities of polluting chemicals are used by paper mills.

Hand-made paper is the best form of recycled paper. It has a fine surface for writing. It is also strong enough for making drawings.

Paper manufacturing is a very old tradition. It was invented in China nearly two thousand years back. Indians used the leaves of palm trees for writing. Papyrus is a kind of paper made from a reed of the same name. It grew on the banks of the River Nile, and was used in Egypt.

The hand-made paper industry flourished in India during the Mughal period. But it died with the setting up of paper mills in the 18th and 19th centuries. Mahatma Gandhi revived it during the freedom movement. Today it is a fast growing industry.

1. Answer the following questions briefly:

- (a) Why is hand-made paper becoming more and more popular?
- (b) Mention two features of hand-made paper.
- (c) What did Indians use for writing when there was no paper?
- (d) What is papyrus?
- (e) Why did the hand-made paper industry die in India in the 18th and 19th centuries?

2. Find words from the above passage that mean the same as:

- (a) control
- (b) prospered
- (c) bring back to life.

Passage 5:

There was a time when all house-work was done by the women or girls of the

KENDRIYA VIDYALAYA NO.1 ROORKEE
AUTUMN BREAK HOLIDAY HOMEWORK (2022-23)

household. Few husbands ever dreamt of washing up, preparing breakfast or tending the baby. Such duties were no concern of theirs. And normal school boy assumed that if help were needed in the home, his sisters would be called on to give it. The whole family supported the view that the male child could not or should not clean, mend, wash, cook or make beds.

Things are very different today. Doctors or barristers find nothing shameful in putting on an apron to help in the kitchen or nursery and even boast of being good at washing of clothes and personal linen.

The school boy is more often now than formerly expected to help his mother. One reason for the change is the shortage of domestic servants. Girls could once be found to do the hard work in middle and upper class homes for very moderate wages. Such girls nowadays work in factories. They earn more money than most householders can afford to pay. Thus the wife now does the household work herself with the aid of labour saving machines; and she expects some help from her husband.

Questions:

1. Answer the following questions briefly:

- (a) Who usually did all house work in the past?
- (b) Mention some household chores that women use to do in their house.
- (c) How did the whole family view the male child?
- (d) How are things different now?
- (e) Mention one reason that has brought this change today?

Find words from the above passage that mean the same as:

- (a) taking care of
- (b) took for granted
- (c) talk proudly
- (d) not excessive

Passage 6:

Conversation is a fine art. It is the art of exchanging thought. It is an art which anybody can cultivate or master. Not everybody can paint or play music, but almost everyone can talk. Thus it affords the greatest pleasure to the greatest number. 'To talk', says R.L. Sleverson, "is our chief business in the world. And talk is by far the most accessible of pleasures. It costs nothing in money, it is all profit. It completes our education, makes friends and can be enjoyed at any age. Conversation is indeed the most teachable of all the arts. All you need to do is to find a subject that interests you and your listeners.

Hobbies are for example, numberless hobbies to talk about. But the important thing is that you must talk about the other fellow's hobby rather than your own. Therein lies the secret of your popularity. There is nothing that pleases people so much as your interest in their interest.

It is just as important to know what subjects to avoid and what subjects to select for good conversation. If you don't want to be set down as a bore, avoid certain unpleasant topics. Avoid talking about yourself unless you are asked to do so. Sickness or death bores everybody. The only one who willingly listens to such talk is, the doctor, but he gets paid for it. You must also know not only what to say but also how to say it.

Questions:

1. Answer the following questions briefly:

- (a) How does the author define and explain the art of conversation?
- (b) How is talking easier to learn than other fine arts?
- (c) What are the subjects one can easily talk about?
- d) Which topics usually bore the listener?
- (e) What should be avoided unless you are asked to do so?

2. Can a physical quantity have units but still be dimensionless?
3. Can a body have zero velocity and still be accelerating?
4. Define non-uniformly accelerated motion.
5. Draw velocity time graph for an object thrown upwards and bounce back again to the same height.
6. Name the physical quantities whose dimensional formula
 - (i) $[ML^{-1}T^{-1}]$
 - (ii) $[ML^2T^{-3}]$
7. The displacement of a body is given to be proportional to the cube of time elapsed. What is the nature of motion of the body?
8. Is the direction of acceleration same as the direction of velocity?
9. A body travels uniformly a distance $(13.8 \pm 0.2)m$ in a time $(4 \pm 0.3)s$. Find the percentage error in velocity.
10. Give the applications of dimensional analysis.
11. Find the value of 100J on a system which has 20cm, 250g and half minute as fundamental units of length, mass and time.
12. Check the dimensional consistency of the following relation $h = \frac{2T \cos \theta}{rg}$, where h= height, T= surface tension, r = radius, g= acceleration due to gravity.
13. When white light travels through glass, the refractive index μ , is found to vary with wavelength (γ) as $\mu = A + \frac{B}{\gamma^2}$, using principle of homogeneity find the dimensions of A and B.
14. A stone is dropped from a balloon rising upwards with a velocity of 16 m/s. The stone reaches the ground in 4s. Calculate the height of the balloon where the stone was dropped.
15. If x,y,z be the distances described by a particle during p^{th} , q^{th} and r^{th} second respectively, prove that $(q - r)x + (r - p)y + (p - q)z = 0$.
16. Derive (i) $S_t = u + a/2(2t - 1)$ (ii) $v^2 = u^2 + 2as$ by calculus method.
17. A large fluid star oscillates in shape under the influence of its own gravitational field. Using dimensional analysis, find the expression for period of oscillation (T) in terms of radius of star (R), mean density of fluid (ρ) and universal gravitational constant G.

AUTUMN BREAK HOLIDAY HOMEWORK (2022-23)

The famine prevalent for many successive years in many provinces has clearly displayed for men of any understanding the effect of malnutrition in generating illness. The city-dwellers, as it was their custom to collect and store enough grain for the whole of the next year immediately after the harvest, carried off all the wheat, barley, beans and lentils, and left to the peasants various kinds of pulse after taking quite a large proportion of these to the city. After consuming what was left in the course of the winter, the country people had to resort to unhealthy foods in the spring; they ate twigs and shoots of trees and bushes and bulbs and roots of inedible plants.....

- (i) Which were the things produced by the peasants? 1
(ii) What does the given passage depict? 1
(iii) What was the custom for the city-dwellers after the harvest? 2

नीचे दिए गए अनुच्छेद को पढ़ें और निम्नलिखित प्रश्नों के उत्तर दें:

कई प्रांतों में लगातार कई वर्षों से पड़ रहे अकाल ने साधारण से साधारण बुद्धि वाले आदमी को भी यह बता दिया कि लोगों में कुपोषण के कारण बीमारियां हो रही हैं। शहर में रहने वाले लोगों का फसल कटाई के शीघ्र बाद अगले पूरे वर्ष के लिए पर्याप्त मात्रा में खाद्यान्न अपने भंडारों में भर लेना एक रिवाज था। सारा गेहूं, जौ, सेम तथा मसूर और दालों का काफी बड़ा हिस्सा शहरियों द्वारा ले जाने के बाद भी कई प्रकार की दालें किसानों के लिए बची रह गई थीं। सर्दियों के लिए जो कुछ भी बचा था, उसे खा-पीकर खत्म करने के पश्चात देहाती लोगों को वसंत ऋतु में अस्वास्थ्यकर खाद्यों पर निर्भर रहना पड़ा था; उन्होंने पेड़ों की टहनियाँ, छालें, जड़ें, झाड़ियाँ अखाद्य पेड़-पौधे और पत्ते खाकर किसी तरह अपने प्राणों को बचाए रखा।

- (i) किसानों द्वारा उत्पादित चीजें कौन सी थीं?
(ii) दिए गए गद्यांश में क्या दर्शाया गया है?
(iii) फसल कटाई के बाद नगरवासियों के लिए क्या प्रथा थी?

Q.17. On given outline map of world, locate the following places-

- (i) Uruk
(ii) Ur
(iii) Sahara Desert

विश्व के दिए हुए रेखामानचित्र पर निम्नलिखित स्थलों को अंकित करें-

- (i) उरुक
(ii) उर
(iii) सहारा रेगिस्तान

1. निम्नलिखित अध्यायों का पुनरीक्षण-

- (i) अध्याय-2, लेखन और नगर जीवन
(ii) अध्याय -3, तीन महाद्वीपों में एक साम्राज्य

2. उपर्युक्त प्रत्येक अध्याय (2 और 3) से १५-१५ बहुवैकल्पिक प्रश्न तैयार करें।

3. छात्र निम्नलिखित अध्याय को अच्छी तरह से पढ़ेंगे और अपनी नोटबुक में मुख्य बिंदुओं को नोट भी करेंगे, जो आपको अलग से उपलब्ध कराए जाएंगे-

- अध्याय-5- खानाबदोश साम्राज्य

4. मानचित्र कौशल: अध्यायों पर आधारित नोटबुक में (अध्याय- 2,3, और 5)

5. उपरोक्त टेस्ट प्रश्न पत्र (पीटी -1) को अपनी कक्षा कार्य नोटबुक में हल करें।

SUBJECT : MATHEMATICS

INSTRUCTIONS: Do all these questions in a separate file (A-4 sheets)

SETS

1. Write down all possible subsets of sets $\{1,2\}$
2. Write down all possible subsets of sets $\{a,b,\{c\}\}$
3. Write number proper subset of a set having six elements.

Write the following sets in set builder form (Question 5 to Question 8)

4. $A = \{5, 10, 15, 20, 25\}$
5. $B = \{5, 25, 125, 625, 3125\}$
6. $C = \{2, 5, 10, 17, 26\}$
7. $D = \{1/2, 2/3, 3/4, 4/5, 5/6\}$
8. $E = \{1/2, 2/5, 3/10, 4/17, 5/26\}$

Write the following sets in roaster form(Question 10 to Question 12)

9. $A = \{x: x \in \mathbb{Z}, x^2 < 25\}$
10. $B = \{x: x \text{ is a letter of the word "principal"}\}$
11. $C = \{x: x \text{ is a two digit natural number such that sum of its digit is } 8\}$
12. $D = \{x: x \text{ is a natural number and divisor of } 36\}$
13. For $A = \{1, 2, 3, 4, 5, 6\}$; $B = \{3, 4, 5, 6\}$, $C = \{4, 5, 7, 8\}$ and $U = \{1, 2, \dots, 8\}$
Find (a) $(A - B)'$, (b) A'
14. For $A = \{1, 2, 3, 4, 5, 6\}$; $B = \{3, 4, 5, 6\}$, $C = \{4, 5, 7, 8\}$ and $U = \{1, 2, \dots, 8\}$
Verify that (1) $(A \cup B)' = A' \cap B'$;
(2) $(A \cap B)' = A' \cup B'$
15. For $A = \{1, 2, 3, 4, 5, 6\}$; $B = \{3, 4, 5, 6\}$, $C = \{4, 5, 7, 8\}$ and $U = \{1, 2, \dots, 8\}$

KENDRIYA VIDYALAYA NO.1 ROORKEE
AUTUMN BREAK HOLIDAY HOMEWORK (2022-23)

Verify that (1) $A - (B \cup C) = (A - B) \cap (A - C)$
(2) $A \cap (B - C) = (A \cap B) - (A \cap C)$

16. A and B are two sets such that $n(A) = 3$ and $n(B) = 6$

Find (1) minimum value of $n(A \cup B)$ (2) maximum value of $n(A \cap B)$.

17. Let A, B and C be 3 sets such that $A \cup B = A \cup C$ and $A \cap B = A \cap C$ show $B = C$.

18. If $A \subset B$ show that $(C - B) \subset C - (C - A)$

19. If $A \subset B$ and $B \subset C$, is it true that $A \subset C$, Explain giving example.

20. Find $A \cup B$ and $A \cap B$ if $A = \{x : x \in \mathbb{Z} \text{ and } x^2 \leq 36\}$, $B = \{x : x \text{ is a prime natural number whose square is } < 50\}$

RELATIONS AND FUNCTIONS

1. If $A = \{2, 3\}$, $B = \{1, 2, 3, 4\}$ and $C = \{3, 4, 5, 6\}$ verify that

(i) $A \times (B \cap C) = (A \times B) \cap (A \times C)$ (ii) $A \times (B \cup C) = (A \times B) \cup (A \times C)$

2. If $A = \{1, 2, 3\}$, $B = \{4, 5, 6\}$ and $C = \{1, 2\}$ find $(A - B) \times (A \cap C)$

3. If $A = \{3, 5\}$, $B = \{5, 6\}$ and $C = \{3, 6\}$, find $(A \times C) - (A \times B)$

4. $A = \{1, 0, -1\}$, $B = \{2, 3\}$, $C = \{1, -1\}$, find $A \times B \times C$ and $B \times A \times C$

5. If $(a, 1)$, $(b, -1)$ and (c, c) are three elements of $A \times B$ and $n(B \times A) = 9$, Find the sets A,

B and $B \times C$. Ans $\{a, b, c\}, \{1, -1, c\}, \{(a, 1), (a, -1), (a, c), (b, 1), (b, -1), (b, c), (c, 1), (c, -1), (c, c)\}$

6. 7. If $A = \{x : x \in \mathbb{N}, x < 4\}$, $B = \{x : x^2 + 5x - 6 = 0, x < 0\}$ then find $A \times B$

7. Let $A = \{1, 2, 3, 4, 5, 6\}$ Define a relation R on set A, $R = \{(x, y) : y = x + 1\}$. Write R ,

represent R using arrow diagram and also write domain and range of R .

8. $f : \mathbb{R} \rightarrow \mathbb{R}$ is defined by, $f(x) = \begin{cases} 1 & , x \in \mathbb{Q} \\ -1 & , x \notin \mathbb{Q} \end{cases}$. Find $f\left(\frac{1}{4}\right)$, $f(\pi)$, $f(\sqrt{2})$

9. Find the domain and range of function given by $f(x) = \frac{x-1}{x-5}$

10. Find domain and range of following functions:

a) $f(x) = \sqrt{x-4}$ b) $f(x) = \frac{1}{\sqrt{1-x}}$ c) $f(x) = \sqrt{25-x^2}$ d) $f(x) = \frac{x^2-4}{x-2}$

(i) $\cos(-480^\circ)$ (ii) $\sin(-1125^\circ)$ (iii) $\cot(690^\circ)$ (iv) $\sin(-765^\circ)$

(v) $\cos 120^\circ$

2) (i) Show that $\cos 510 \cdot \cos 330 + \sin 390 \cdot \cos 120 = -1$

(ii) Show that $\sin(-420) \cos 390 + \cos(-660) \sin 330 = -1$

3) Evaluate $\cot(90+x) + \tan(180+x) + \sec(360-x) + \operatorname{cosec}(270-x)$

4) If $A - B = \pi/4$, Show that $(1 + \tan A)(1 + \tan B) = 2 \tan A$

5) If $\tan(A+B) = x$ and $\tan(A-B) = y$, then Find $\tan 2A$

6) Show that $\tan 8\theta - \tan 6\theta - \tan 2\theta = \tan 8\theta \cdot \tan 6\theta \cdot \tan 2\theta$

7) Show that $\cot 3x \cdot \cot 4x - \cot 7x \cdot \cot 3x - \cot 7x \cdot \cot 4x = 1$

8) Show that $\cos 20^\circ \cos 40^\circ \cos 60^\circ \cos 80^\circ = 1/16$

9) Show that $\sin 20^\circ \sin 40^\circ \sin 60^\circ \sin 80^\circ = 3/16$

10) If $A + B = \pi/4$, Show that $(1 + \tan A)(1 + \tan B) = 2$

COMPLEX NUMBERS

1) $i^{49} + i^{68} + i^{89} + i^{110}$

2) $i^{37} + i^{-67}$

3) $1 + i^{10} + i^{20} + i^{30}$

4) $2i^2 + 6i^3 + 3i^{16} - 6i^{19} + 4i^{25} + 4$

5) Show that $i^n + i^{n+1} + i^{n+2} + i^{n+3} = 0$

6) Show that $(-i)^{4n+3} = i$

9) $\frac{2+3i}{1+2i} + \frac{1+i}{2+i}$

10) $\frac{(1+i)(1+2i)}{1+3i}$

11) Find x and y in the following case

$$3x + (2x - 3y)i = 6 + 3i$$

12) Find x and y in the following case

$$13) (x+i).(x+iy) = 2 - 5i$$

14) Find x and y in the following case

$$(x+iy)(2-3i) = 4-3i$$

15) **Find the conjugate and the modulus of the followings**

a) $(3-2i).(3+2i)(1+i)$ b) $(2+3i)^2$

16) If conjugate of $(x+iy)(2-3i)$ is $7+4i$, find x & y

17) If conjugate of $(x-iy)(3+5i)$ is $-6-24i$, find x & y

18) If $\left(\frac{1+i}{1-i}\right)^{100} = a+bi$, find a and b

19) Find the least value of n if $\left(\frac{1+i}{1-i}\right)^n = 1$

20) If $z_1 = 2+3i$ and $z_2 = -1+3i$, then find $\text{Im}\left(\frac{z_1 z_2}{\bar{z}_1}\right)$

Autumn break Holiday HW OCT 2022

Class 11

Dear students,

You have to make a Project file in this autumn break.

Guidelines for the project are as follows:

- Project should be of 3,500-4,000 words (excluding diagrams & graphs), **ONLY hand-written**
- It will be an independent, self-directed piece of study.

Expected Checklist:

- Introduction of topic/title
- Identifying the causes, consequences and/or remedies
- Various stakeholders and effect on each of them
- Advantages and disadvantages of situations or issues identified
- Short-term and long-term implications of economic strategies suggested in the course of research
- Validity, reliability, appropriateness and relevance of data used for research work and for presentation in the project file
- Presentation and writing that is succinct and coherent in project file
- Citation of the materials referred to, in the file in footnotes, resources section, bibliography etc.

Mode of presentation/submission of the Project:

Each student will present the project in a Spiral file containing A4 size sheets One-side ruled, One side plain.

Marking Scheme :

Marks are suggested to be given as –

S. No.	Heading	Marks Allotted
1.	Relevance of the topic	3
2.	Knowledge Content/Research Work	6
3.	Presentation Technique	3
4.	Viva-voce	8
	Total	20 Marks

HOME ASSIGNMENT (AUTUMN BREAK)

CHAPTER-1

- 1) Two charges each $2 \times 10^{-7} C$ but opposite in sign forms a system. These charges are located at points A (0,0, -10) cm and B (0,0, +10) cm respectively. What is the total charge and electric dipole moment of the system?
- 2) Suppose the spheres A and B have identical sizes. A third sphere of the same size but uncharged is brought in contact with the first, then brought in contact with the second, and finally removed from both. What is the new force of repulsion between A and B?

KENDRIYA VIDYALAYA NO.1 ROORKEE
AUTUMN BREAK HOLIDAY HOMEWORK (2022-23)

- 3) Two point charges $+q$ and $+9q$ are separated by a distance of $10a$. Find the point on the line joining the two charges where electric field is zero?
- 4) Consider a uniform electric field $E = 3 \times 10^3 \text{ iN/C}$. (a) What is the flux of this field through a square of 10 cm on a side whose plane is parallel to the yz plane? (b) What is the flux through the same square if the normal to its plane makes a 60° angle with the x -axis?
- 5) A point charge $+10 \mu\text{C}$ is a distance 5 cm directly above the centre of a square of side 10 cm , as shown in Fig. 1.34. What is the magnitude of the electric flux through the square?

- 6) ABCD is a square of side 5 cm . Charges of $+50 \mu\text{C}$, $-50 \mu\text{C}$ and $+50 \mu\text{C}$ are placed at A, C and D respectively. Find the resultant electric field at point B.

UNIT-II CURRENT ELECTRICITY

1. A cell of emf 2 V and internal resistance 0.1Ω is connected to a 3.9Ω external resistance. What will be the p.d. across the terminals of the cell?
2. Out of the two bulbs marked 25 W and 100 W , which one has higher resistance.
3. A cell of 6 V and internal resistance 2Ω is connected to a variable resistor. For what value of current does maximum power dissipation occur in the circuit?
4. What is the largest voltage you can safely put across a resistor marked $98 \Omega - 0.5 \text{ W}$?
5. Two heater wires of the same dimensions are first connected in series and then in parallel to a source of supply. What will be ratio of heat produced in two cases?
6. Using data given in graph determine (i) emf (ii) internal resistance of the cell.
(iii) For what current, does maximum power dissipation occur in the circuit?

KENDRIYA VIDYALAYA NO.1 ROORKEE
AUTUMN BREAK HOLIDAY HOMEWORK (2022-23)

You are given 'n' resistors each of resistance 'r'. These are first connected to get of minimum possible resistance. In the second case these are again connected differently to get maximum possible resistance. Compute the ratio between the maximum and minimum

Unit-III(Magnetic Effect of Current and magnetism)

VSA Questions:

- 1.State Biot – Savart law and express this law in the vector form.
2. A current I flows in a conductor placed perpendicular to the plane of the paper. Indicate the direction of the magnetic field due to a small element $d\vec{l}$ at point P situated at a distance \vec{r} from the element as shown in figure.
3. Write, using Biot – Savart's law, the expression for the magnetic field \vec{B} due to an element $I d\vec{l}$ carrying current I at a distance \vec{r} from it in a vector form.
- 4.Using Biot-Savart law, deduce the expression for the magnetic field at a point (o) on the axis of a semi-circular current carrying loop of radius R. How is the direction of the magnetic field determined at this point?

- 5.What is SI unit of absolute permeability of free space?
- 6.What is the effect of absolute permeability of medium on the magnetic field?
- 7.State Right hand thumb rule.
- 8.Draw magnetic field lines of circular current carrying conductor.
- 9.Draw magnetic field lines of straight current carrying conductor.

Short Answer Questions and Numericals:

- 1.If straight current makes magnetic field circular whereas circular current makes magnetic field istraight. Explain with example
- 2.Write any two important points of similarities and differences each between Coulomb's law for the electrostatic field and Biot-Savart's law for the magnetic field.

AUTUMN BREAK HOLIDAY HOMEWORK (2022-23)

4. Find the ratio of the magnitudes of the magnetic field of a current carrying coil at the centre and at an axial point for which $x = R\sqrt{3}$

Long Answer Questions and Numericals:

1. Use Biot-Savart's law to find expression for the magnetic field due to a circular loop of radius ' r ' carrying current ' I ' at its centre

2. Using Biot-Savart law, deduce the expression for the magnetic field at a point P on the axis of a circular current carrying loop of radius R. How is the direction of the magnetic field determined at this point?

3. A wire of length L is bent round in the form of a coil having N turns of same radius. If a steady current I flows through it in a clockwise direction, find the magnitude and direction of the magnetic field produced at its centre

4. A straight wire of length L is bent into a semicircular loop. Use Biot-Savart's law to deduce an expression for the magnetic field at its centre due to current I passing through it.

5. An electron is moving parallel to an infinite long straight conductor carrying current of 2A in the direction of current at a perpendicular distance of 1m from conductor in vacuum. Find magnitude and direction of force if conductor is carrying current along east –west direction.

Chapter – 6 Electromagnetic Induction

Objective Questions (1 Mark) - (Very Short Answer(VSA) Type)

MCQs

1. The total number of magnetic field lines passing through an area is termed as?

- a) Voltage b) EMF c) Magnetic flux d) Magnetic flux density

2. The formula for induced emf is _____

- a) $e=B^2l$ b) $e=Blv$ (c) $e=Blv$ d) $e=Bv^2$

3. If a conductor 0.2m long moves with a velocity of 0.3m/s in a magnetic field of 5T, calculate the emf induced.

- a) 0.3V b) 0.03V c) 30V d) 3V

4. Magnetic flux of 5 mwb is linked with a coil, when current of 1 mA flows through it, Self induced will be

- a) 1 H b) 5 H c) 20 H d) 50 H

KENDRIYA VIDYALAYA NO.1 ROORKEE

AUTUMN BREAK HOLIDAY HOMEWORK (2022-23)

5. According to Faraday's laws of electromagnetic induction, an emf is induced in a conductor whenever?

- a) The conductor is perpendicular to the magnetic field
- b) Lies in the magnetic field
- c) Cuts magnetic lines of flux
- d) Moves parallel to the magnetic field

6. Direction of induced current is determined by _____

- a) Fleming's left hand rule
- b) Fleming's right hand rule
- c) Faraday's law
- d) Right hand thumb rule

7. A bicycle generator creates 3 V, when bicycle is travelling with a speed of 9.0 km/h, the emf generated. The emf will be, when travelling with 15 km/h

- a) 20 V
- b) 10 V
- c) 0 V
- d) 5.0 V

8. As the number of turns in the coil increases, what happens to the inductance of the coil?

- a) Increases
- b) Decreases
- c) Remains the same
- d) Becomes zero

9. If the current changes from 20A to 10A in 5 seconds and the value of inductance is 1H, calculate the emf induced.

- a) 8V
- b) 6V
- c) 4V
- d) 2V

10. The phenomenon due to which there is an induced current in one coil due to the current in a neighbouring coil is?

- a) Eddy currents
- b) Self induction
- c) Mutual induction
- d) Steady current

One Word or One Line:

11. Write S.I. unit of magnetic flux. Is it a scalar or a vector?

12. The electric current is increasing in a straight wire from A to B. What is the direction of induced current in the metallic loop kept above the wire as shown in the fig.

13. A bar magnet falls from a height 'h' through a metal ring. Will its acceleration be equal to g? Give reason for your answer.

14. Why does a metallic piece become very hot when it is surrounded by a coil carrying high frequency alternating current?

2 Marks or 3 Marks Questions (Short Answer Type)

- 1. What are eddy currents? Give their one use.
- 2. State Lenz's law. Show that it is in accordance with the law of conservation of energy.
- 3. Two identical loops, one of copper and the other of aluminum, are rotated with the same angular speed in the same magnetic field. Compare (i) the induced emf and (ii) the current produced in the two coils. Justify your answer.
- 4. Prove that average power consumed over a complete cycle of ac through an ideal inductor is zero.
- 5. A copper ring is suspended by a thread in a vertical plane. North Pole of a magnet is brought horizontally towards the ring. Will the magnet affect the position of the ring? Explain.
- 6. What is the effect on the mutual inductance between the pair of coil when

KENDRIYA VIDYALAYA NO.1 ROORKEE

AUTUMN BREAK HOLIDAY HOMEWORK (2022-23)

(i) the distance between the coils is increased?

(ii) the number of turns in each coil is decreased? Justify your answer in each case.

7. A rectangular loop and a circular loop are moving out of a uniform magnetic field region to a field-free region with a constant velocity v . In which loop do you expect the induced emf to be constant during the passage out of the field region? The field is normal to the loops.

8. A rectangular conductor LMNO is placed in a uniform magnetic field of 0.5 T. The field is directed perpendicular to the plane of the conductor. When the arm MN of length of 20 cm is moved towards left with a velocity of 10 ms^{-1} , calculate the emf induced in the arm. Given the resistance of the arm to be 5Ω (assuming that other arms are of negligible resistance) find the value of the current in the arm.

9. How eddy currents are reduced in a metallic core?
10. As soon as current is switched on in a high voltage wire, the bird sitting on it flies away. Why?

5 Marks Questions - (Long Answer Type)

- (a) Define the coefficient of self-inductance. Find the coefficient of self-inductance of a long co-axial solenoid.
(b) A metallic rod of length l is rotated at a constant angular speed ω , normal to a uniform magnetic field B . Derive an expression for the current induced in the rod, if the resistance of the rod is R .
- Explain the working of an AC generator with the help of a labelled diagram and hence derive expression for the emf produced by a.c. generator.
- (a) What is motional electromotive force (motional emf)?
(b) A rod of length l is moved horizontally with a uniform velocity ' v ' in a direction perpendicular to its length through a region in which a uniform magnetic field is acting vertically downward. Derive the expression for the emf induced across the ends of the rod.
(c) Two circular coils, one of radius r and the other of radius R are placed coaxially with their centres coinciding. For $R \gg r$, find the mutual inductance of the arrangement.

CONTINUITY AND DIFFRENTIABILITY

1. For what value of k is the following function continuous at $x = 2$?

$$f(x) = \begin{cases} 2x + 1; & x < 2 \\ k; & x = 2 \\ 3x - 1; & x > 2 \end{cases}$$

2. If $f(x) = \begin{cases} 3ax + b, & \text{if } x > 1 \\ 11 & \text{if } x = 1 \\ 5ax - 2b, & \text{if } x < 1 \end{cases}$, continuous at $x = 1$, find the values of a and b.

3. If $f(x)$, defined by the following is continuous at $x = 0$, find the values of a, b, c

$$f(x) = \begin{cases} \frac{\sin(a+1)x + \sin x}{x}, & x < 0 \\ c, & x = 0 \\ \frac{\sqrt{x+bx^2} - \sqrt{x}}{bx^{3/2}}, & x > 0 \end{cases}$$

4. If $x = a \left(\cos \theta + \log \tan \frac{\theta}{2} \right)$ and $y = a \sin \theta$ find $\frac{dy}{dx}$ at $\theta = \frac{\pi}{4}$.

5. If $y = (\log x)^{\cos x} + \frac{x^2 + 1}{x^2 - 1}$, find $\frac{dy}{dx}$.

6. If $xy + y^2 = \tan x + y$, find $\frac{dy}{dx}$.

7. If $y = \sqrt{x^2 + 1} - \log \left(\frac{1}{x} + \sqrt{1 + \frac{1}{x^2}} \right)$, find $\frac{dy}{dx}$.

8. If $\sqrt{1-x^2} + \sqrt{1-y^2} = a(x-y)$, prove that $\frac{dy}{dx} = \sqrt{\frac{1-y^2}{1-x^2}}$.

9. Find $\frac{dy}{dx}$ if $(\cos x)^y = (\cos y)^x$

10. If $x^p \cdot y^q = (x+y)^{p+q}$, prove that $\frac{dy}{dx} = \frac{y}{x}$.

APPLICATIONS OF DERIVATIVES

- 1) Find the point on the curve $y^2 = 8x$ for which the abscissa and ordinate change at the same rate?
- 2) A man 2 metre high walks at a uniform speed of 6km/h away from a lamp post 6 metre high. Find the rate at which the length of his shadow increases. Also find the rate at which the tip of the shadow is moving away from the lamp post.
- 3) A ladder 5m long is leaning against a wall. Bottom of ladder is pulled along the ground away from wall at the rate of 2m/s. How fast is the height on the wall decreasing when the foot of ladder is 4m away from the wall?
- 4) A particle moves along the curve $6y = x^3 + 2$, Find the points on the curve at which y-coordinate is changing 8 times as fast as the x-coordinate.
- 5) Water is leaking from a conical funnel at the rate of 5 cm³/sec. If the radius of the base of the funnel is 10 cm and altitude is 20 cm, Find the rate at which water level is dropping when it is 5 cm from top.
- 6) Find the intervals in which the function $f(x) = \sin x - \cos x$, $0 < x < 2\pi$ is increasing or decreasing.
- 7) Show that the function $f(x) = \frac{\sin x}{x}$ is strictly decreasing on $(0, \pi/2)$
- 8) Find the intervals in which the function $f(x) = \frac{\log x}{x}$ is increasing or decreasing.
- 9) Find the interval in which the function $f(x) = 2x^3 + 9x^2 + 12x + 20$ is (i) increasing (ii) decreasing
- 10) Find the interval in which the function $f(x) = (x+1)^3(x-1)^3$
- 11) Show that the height of cylinder of maximum volume that can be inscribed in a sphere of radius R is $\frac{2R}{\sqrt{3}}$.
- 12) Show that the semivertical angle of a cone of maximum volume and of given slant height is $\tan^{-1} \sqrt{2}$.

- 13) Length of three sides of a trapezium other than base is equal to 10cm each, then find the area of the trapezium when it is maximum ?
- 14) Find the point on the curve $y^2 = 2x$ which is at minimum distance from the point (1,4)
- 15) An open box with a square base is to be made out of a given quantity of card board of area c^2 square units. Show that the maximum volume of the box is $\frac{c^3}{6\sqrt{3}}$ cubic units.
- 16) A window is in the shape of a rectangle surmounted by an equilateral triangle. If the perimeter of the window is 12 m, find the dimensions of the rectangle that will produce the largest area of the window.

DEFINITE INTEGRALS

$$1. \int_0^{\pi/2} \frac{\sqrt{\tan x}}{1 + \sqrt{\tan x}} dx$$

$$2. \int_1^3 \frac{\sqrt{4-x}}{\sqrt{x} + \sqrt{4-x}} dx$$

$$3. \int_0^{\pi/2} \frac{\sin^4 x}{\sin^4 x + \cos^4 x} dx$$

$$4. \int_0^{\pi/2} \frac{x}{\sin x + \cos x} dx$$

$$5. \int_0^{\pi} \frac{x \sin x}{1 + \cos^2 x} dx$$

$$6. \int_0^{\pi} \frac{x \tan x}{\sec x \cdot \operatorname{cosec} x} dx$$

$$7. \int_{\pi/6}^{\pi/3} \frac{dx}{1 + \sqrt{\tan x}}$$

$$8. \int_0^{\pi} \frac{x}{1 + \sin x} dx$$

$$9. \int_0^{\pi} \frac{x + \sin x}{1 + \cos x} dx$$

$$10. \int_0^{\pi/4} \log(1 + \tan x) dx$$

$$11. \int_0^4 (|x| + |x-2| + |x-4|) dx \text{ (CBSE-2013)}$$

$$12. \int_2^5 (|x-2| + |x-3| + |x-4|) dx$$

APPLICATIONS OF INTEGRATION

- Find the area of the region included between the parabola $y^2 = x$ and the line $x + y = 2$.
- Find the area of the region bounded by $x^2 = 4y$, $y = 2$, $y = 4$ and the y-axis in the first quadrant.
- Using integration compute the area of the region bounded by the triangle whose vertices are (2, 1), (3, 4), and (5, 2).
- Using integration compute the area of the region bounded by the triangle whose vertices are (-1, 1), (0, 5), and (3, 2).
- Using integration compute the area of the region bounded by the lines $x + 2y = 2$, $y - x = 1$, and $2x + y = 7$.

Q.7 Draw the geometrical isomers of complex $[\text{Pt}(\text{en})_2\text{Cl}_2]^{2+}$.

Q.8 Out of NH_3 and CO , which ligand forms a more stable complex with a transition metal and why?

Q.9 Out of NH_3 and 'en', which ligand forms more stable complex with metal and why?

Q.10 For the complex $[\text{Fe}(\text{en})_2\text{Cl}_2]\text{Cl}$, identify the following:

- (i) Oxidation number of iron.
- (ii) Hybrid orbitals and shape of the complex.
- (iii) Magnetic behaviour of the complex.
- (iv) Number of its geometrical isomers.
- (v) Whether there may be optical isomer also.
- (vi) Name of the complex.

Q.11 What is meant by crystal field splitting energy? On the basis of crystal field theory, write the electronic configuration of d^4 in terms of t_{2g} and e_g in an octahedral field when (i) $\Delta_0 > P$ (ii) $\Delta_0 < P$

Q.12 State a reason for each of the following situations:

- (i) Co^{2+} is easily oxidised to Co^{3+} in presence of a strong ligand.
- (ii) CO is a stronger complexing reagent than NH_3 .
- (iii) The molecular shape of $\text{Ni}(\text{CO})_4$ is not the same as that of $[\text{Ni}(\text{CN})_4]^{2-}$.

iv) Nickel (II) does not form low spin octahedral complexes.

(v) $[\text{Fe}(\text{CN})_6]^{4-}$ and $[\text{Fe}(\text{H}_2\text{O})_6]^{2+}$ are of different colours in dilute solutions.

vi) $[\text{NiCl}_4]^{2-}$ is paramagnetic while $[\text{Ni}(\text{CO})_4]$ is diamagnetic, though both are tetrahedral.

$[\text{Fe}(\text{H}_2\text{O})_6]^{3+}$ is strongly paramagnetic whereas $[\text{Fe}(\text{CN})_6]^{3-}$ is weakly paramagnetic.

Q.13 Give two examples of ligands which form coordination compounds useful in analytical chemistry.

Q.14 When a coordination compound $\text{CoCl}_3 \cdot 6\text{NH}_3$ is mixed with AgNO_3 , 3 moles of AgCl are precipitated per mole of the compound. Write

- (i) Structural formula of the complex
- (ii) IUPAC name of the complex .

Autumn break Holiday HW OCT 2022-23

Class XII

Dear students,

You have to make a Project file in this autumn break.

Guidelines for the project are as follows:

- Project should be of 3,500-4,000 words (excluding diagrams & graphs), **ONLY hand-written**
- It will be an independent, self-directed piece of study.

Expected Checklist:

- Introduction of topic/title
- Identifying the causes, consequences and/or remedies
- Various stakeholders and effect on each of them
- Advantages and disadvantages of situations or issues identified
- Short-term and long-term implications of economic strategies suggested in the course of research
- Validity, reliability, appropriateness and relevance of data used for research work and for presentation in the project file
- Presentation and writing that is succinct and coherent in project file
- Citation of the materials referred to, in the file in footnotes, resources section, bibliography etc.

Mode of presentation/submission of the Project:

Each student will present the project in a Spiral file containing A4 size sheets/ assignment sheets- One side plain.

Marking Scheme :

Marks are suggested to be given as –

S. No.	Heading	Marks Allotted
1.	Relevance of the topic	3
2.	Knowledge Content/Research Work	6
3.	Presentation Technique	3
4.	Viva-voce	8
	Total	20 Marks

Topics:
